HOUSEKEEPING

READING OF THE MINUTES OF LAST MEETING – APPROVED AS PUBLISHED

SAFETY MESSAGE

HEATING SAFETY:

There is something about the winter months and curling up with a good book by the fireplace. But did you know that heating equipment is one of the leading causes of home fire deaths during the months of December, January and February?

With a few simple safety tips and precautions you can prevent most heating fires from happening.

Keep anything that can burn at least three-feet away from heating equipment, like the furnace, fireplace, wood stove, or portable space heater.

Never use your oven to heat your home.

Always use the right kind of fuel, specified by the manufacturer, for fuel burning space heaters.

Test smoke alarms and carbon monoxide detectors monthly.
